GOKUL RJ

LEAD ENGINEER
UNITY & UNREAL ENGINE

SUMMARY

Lead XR Engineer with 8+ years of experience developing augmented reality (AR), virtual reality (VR), real-time simulations and games. Combines Unity and Unreal Engine expertise with software architecture, team coordination and hands-on delivery. Experience spans industrial training, healthcare rehabilitation, digital twins and athlete training.

EDUCATION

BE . Computer Science and Engineering

Narayanaguru College of
Engineering, Kanyakumari
2012 - 2016

Trainee -Unity Game Development

Smartway Solutons , Ernakulam
2016 - 2017

CORE TECHNICAL SKILLS

- Unity3D
- Unreal Engine
- Unity C#
- Unreal CPP / Blueprint
- Autodesk Maya
- Substance Painter
- Blender3D
- Open XR
- Meta XR , Wave XR
- AR core , AR Kit
- SceneView , Realitykit

OTHER SKILLS

- Team coordination
- Project Management
- Customer Communication
- Software architecture
- code reviews

LANGUAGES

- English (Fluent)
- Malayalam (Fluent)
- Tamil (Basic)

WORK EXPERIENCE

Consultant AR Developer , AIONOS INDIA Pvt Lim

June 2026 - Present

- Developed AR features for HoloSports, an athlete-training platform supporting immersive practice and coach collaboration.
- Integrated AI models through APIs, connecting model capabilities with application workflows.
- Integrated Agora video calling to support live communication and remote collaboration within the platform.

Lead Engineer - Software Systems at TravancoreAnalytics Pvt Lim

Jan 2021 - Dec 2025

- Led architecture and feature development for XR applications, coordinating engineering teams, reviewing code and maintaining product quality standards.
- Led Unity-based VR projects spanning forklift operation, rehabilitation, underwater pipeline repair, clinical training and collaborative virtual spaces.
- Developed Unreal Engine digital-twin features with BIM/Datasmith integration and Nanite; enabled browser access to server-hosted builds through Pixel Streaming.
- Built Android AR training interactions, including model scaling, rotation, dismantling and reassembly, with audio narration and subtitles.
- Optimized real-time scenes and assets through texture, polygon-count and draw-call improvements across showroom and simulation projects.

Game Developer / Trainer at Toonz Media Group

Sep 2017 - Oct 2020

- Held a combined game-development and training role.

CERTIFICATIONS

Unity Certified Developer

Jan 2018 - Jan 2020

SELECTED PROJECTS

Virtual Forklift – Nexus | Lead Engineer

- Led architecture, feature implementation, team coordination and code reviews for a VR forklift training platform featuring scoring, custom controllers, steering-wheel input and a portal for licenses, users and training progress.
- Unity, OpenXR, VIVEPORT SDK | HTC Vive Focus 3, SteamVR, Windows

Harbour Platform – Digital Twin | Unreal Developer

- Integrated BIM models through Datasmith, enhanced city visualization with Nanite and implemented Pixel Streaming for browser access to server-hosted Unreal Engine builds.
- Unreal Engine, Datasmith, Nanite, Pixel Streaming | Web

Neuromersiv – Ulysses | Lead Engineer

- Led architecture and feature development for VR-assisted life-skills rehabilitation. The platform combines everyday task scenarios, hand-tracked interactions, scoring, rewards and guided activities.
- Unity, Flutter | Meta Quest, Web

VR Clinical Training | Lead Engineer

- Led engineering for emergency airway-management training with interactive equipment, guided procedures and tracking of user actions, response times and technique effectiveness.
- Unity | Meta Quest

Gas Pipeline Repair VR | Lead Engineer

- Led architecture, feature implementation and code reviews for underwater pipeline-repair training. The application includes hand-tracked welding and fastening interactions with voice guidance.
- Unity, Blender, Substance Painter | Meta Quest

Meta Reality Space | Senior Unity Developer

- Led architecture and feature development for customizable virtual spaces with multi-user access, avatars, real-time asset modification, hand interactions and voice communication.
- Unity, Socket.IO | Meta Quest

AR MiG-29K RD-33MK Engine Training | Senior Unity Developer

- Developed an Indian Navy AR training application with engine-part exploration, scaling, rotation, dismantling and reassembly. Implemented audio narration and subtitles, and performed Android device testing.
- Unity, Vuforia SDK | Android

Additional work | Developer

- Unreal Engine flight-simulator levels, vehicles, shaders and particles
- Unity virtual-showroom asset workflows
- Circuit-component logic and 3D assets for a virtual circuit-board training application
- Casual games and FPS/racing prototypes.
